PROBLEM STATEMENT ID – 26091

AI-Driven Hyper-Local Business Advisory and Financial Structuring Assistant for Rural Micro- Entrepreneurs

Theme – Agriculture, FoodTech & Rural Development

PS Category – Software

Team ID – [ENTER TEAM ID]

Team Name – [ENTER REGISTERED TEAM NAME]

IDEA TITLE

Proposed Solution

A single multilingual assistant that answers two questions: “Is this business viable here?” and “How should it be financed?”

1. USER INPUT

Location

Village / Block / District

Margin Capital

Available contribution

Business Type

Dairy / Retail / Textiles / etc.

MODULE 1 • HYPER-LOCAL FEASIBILITY

Market Reach	5–10 km consumer & distribution view
Opportunity	Unserved / underserved niches
Local Risk	SWOT • seasonality • supply bottlenecks
Competition	Similar-business density
Pricing	Local purchasing-power based guidance

MODULE 2 • FINANCIAL ROUTER

Project Cost	Margin ÷ 10%
Max Loan	90% of feasible project cost
Scheme Fit	Rule-based scheme selection
Repayment	EMI • moratorium • quarterly view
Decision	Clear next-step funding roadmap

OUTPUT → Local Feasibility Report + Financial Structure + Repayment View + Actionable Next Steps

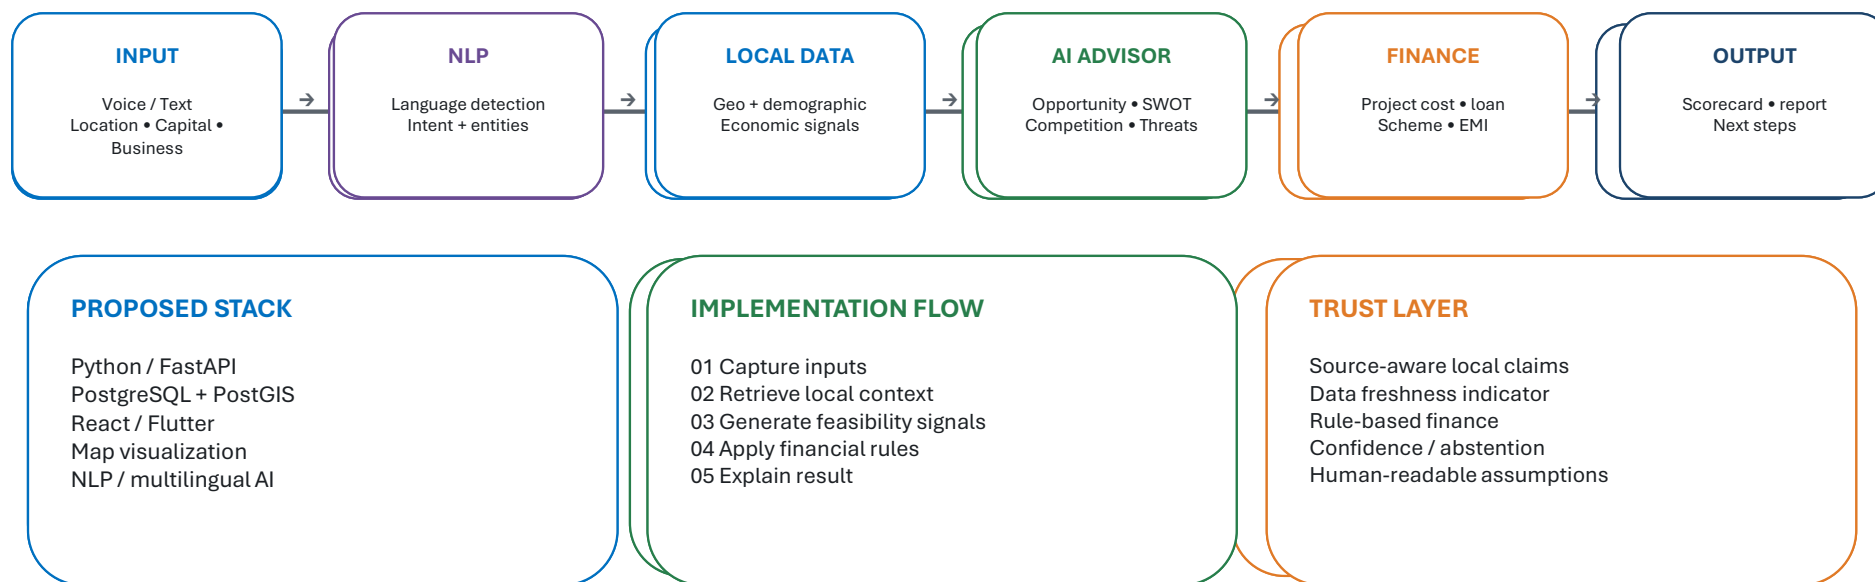

TECHNICAL APPROACH

Technical Approach

Ground the advisory layer in retrievable local signals; keep financial calculations deterministic and auditable.

Prototype surfaces • Conversational intake • Local opportunity map • Competitor view • Financial calculator • Feasibility report

FEASIBILITY AND VIABILITY

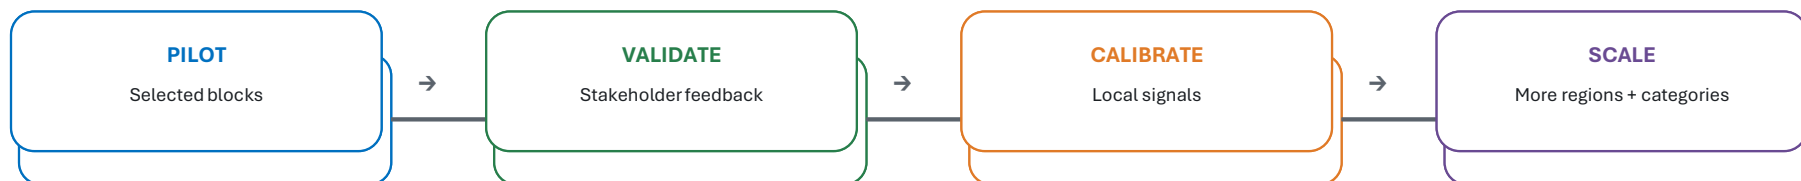

Feasibility and Viability

The MVP is modular: start with a limited geography, validate local signals, then scale.

VIABILITY ROADMAP

Success criterion: every local claim is traceable; every financial result is reproducible.

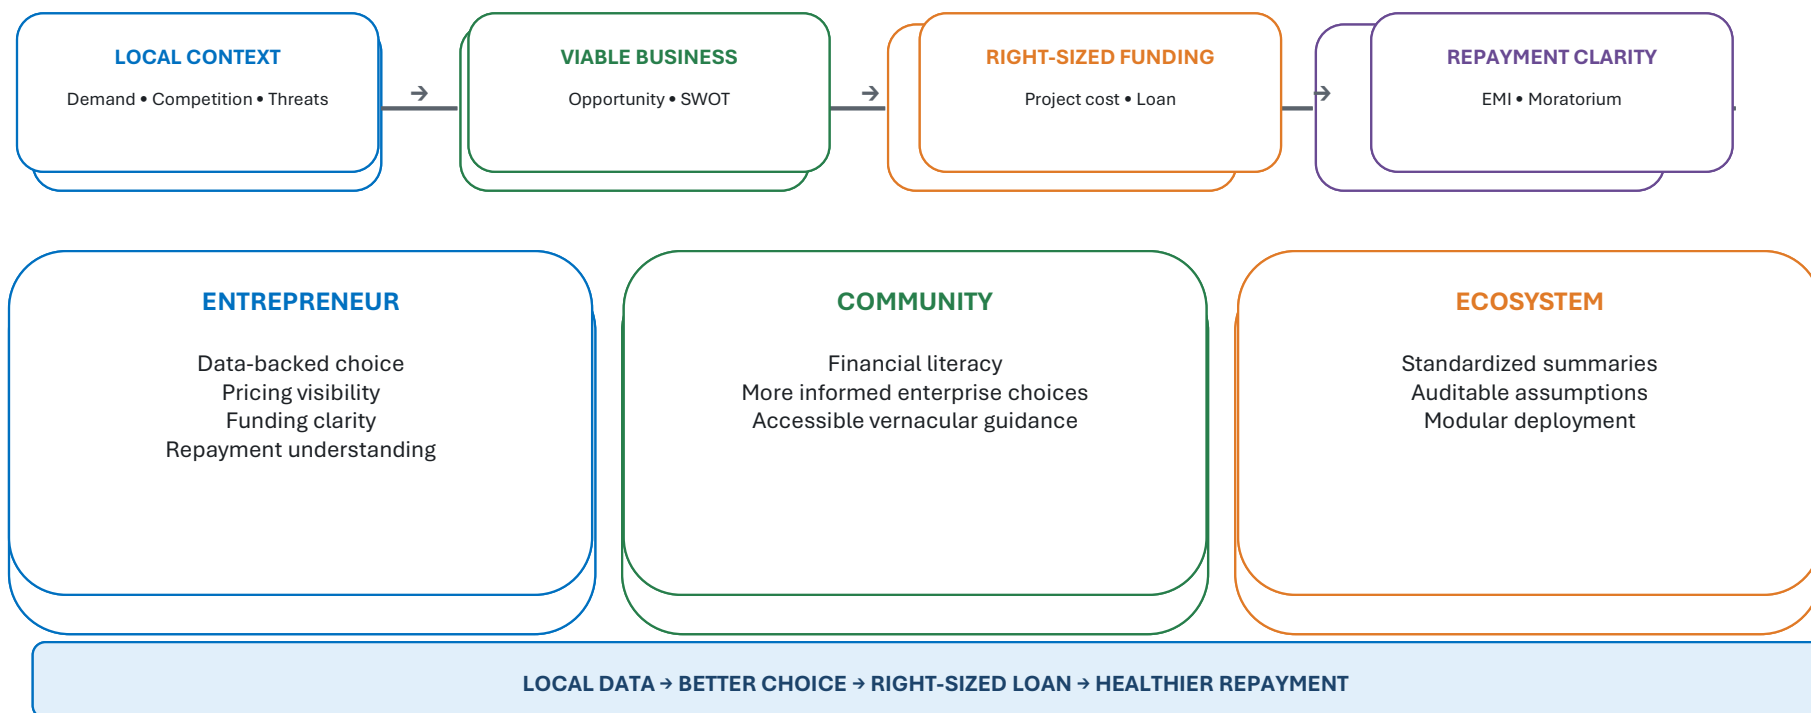

IMPACT AND BENEFITS

Impact and Benefits

Better business selection + better financial structure can reduce preventable decision errors before borrowing.

Research and References

Working sources used to shape the solution, data strategy and financial-routing concept.
